

Initial Plan for SWENG Project

- I want to see if I can build a website that takes a repo and find's out who are the 10exer's of this repo. I want to then shortlist this group of 10exers to who is the 10exer of the 10exers .ie the 1% of the 1%
- Behind the scenes my measurement of a 10 exer are the programmers with;
 1. Most Commits
 2. Most Issues
 3. Most Pull Requests
- I will graph the top 10 of each of these fields into graphs
- I will then try to find if there is anyone that is present in all of these fields
- I will then try graph them
- This general idea may change in the future depending on how possible it is to do

8WENG

• who is the 10xer of a repo?

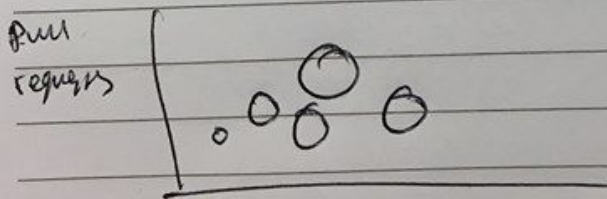

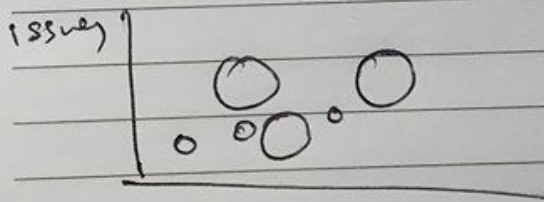

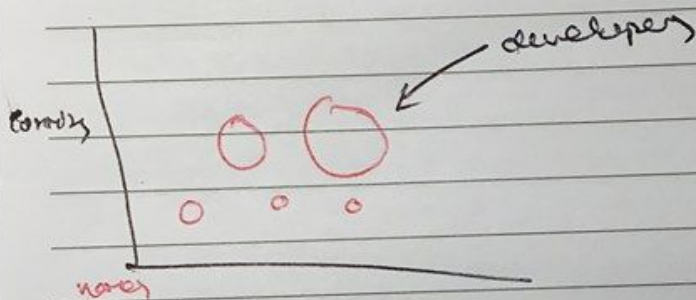

→ most commits

→ most issues

→ most pull requests

{ top 10

↳ who is the 10xers?

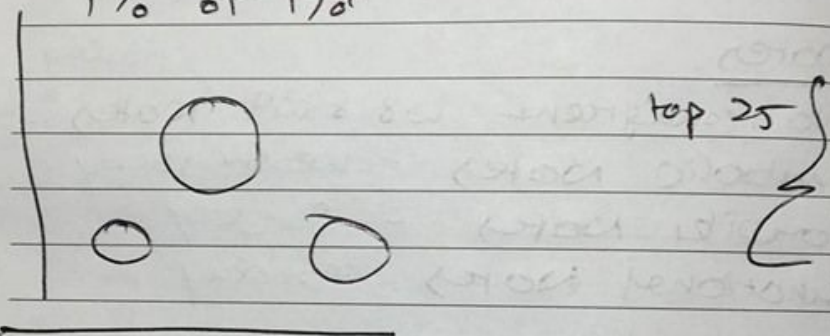

to list of people on call
ex. 5 people

contributions this year

1% of 1%

top 25

top 25
